## **EPTA ANTICIPATES FUTURE TRENDS AT CHILLVENTA**

**What is the future of refrigeration?** What are the new ideas for natural refrigerants? Today **Epta** responds to the requirements of the future by presenting at **Chillventa**, along with the major experts from the sector, the driving forces behind innovation in the coming years. **(Pad. 9 Stand 9-13)**

Chillventa is the leading biennial fair for refrigeration, air-conditioning, ventilation and heat pumps, scheduled to take place from **11 to 13 of October** in the **Nuremberg Exhibition Centre** and is an important opportunity for exchange between producers, associations and universities and an occasion for them to get up-to-date with the latest technologies and developments in the market. With more than **31,000 visitors** expected and about **1,000 registered exhibitors**, the three-day event, which is now in its fourth edition, looks set to be the most popular edition of all. Moreover, the exclusive Chillventa CONGRESS and the numerous meetings that have been organised, including the **Refrigeration Forum**, further contribute to the attractiveness of the event.

**William Pagani, Group Marketing Director of Epta** comments: *"Chillventa is a fair dedicated to the professionals of the sector and for us it represents an important opportunity to meet the most influential decision-makers of the **HVAC&R segment** as well as a prestigious international showcase for the latest solutions that were designed by our R&D department. In this regard, in order to respond to the increasingly pressing requirements for energy saving, we will be offering new solutions **with natural refrigerants** to **integrate refrigeration systems with heating and ventilation systems** and enhance the **tele-monitoring service**, which allows a timely adjustment of system parameters and a resulting improvement in performances."*
